- 300 x 400 mm
- 400 x 400 mm
- 500 x 400 mm
- 600 x 400 mm

Holds displays with the following VESA mounting hole pattern:

- 75 x 75 mm
- 100 x 100 mm
- 200 x 100 mm
- 200 x 200 mm

WARNING

Gefährdung durch gespeicherte Energie: Der Lift-Mechanismus im Turm steht unter Spannung und bewegt sich aus eigenem Antrieb schnell nach oben, sobald das befestigte Zubehör entfernt wird. Aus diesem Grunde darf das Zubehör NICHT ENTFERNT WERDEN oder die Einstellung der Spannung verändert werden, bevor der vordere Geräteteil sich auf der höchsten Position am Turm befindet! Werden diese Anweisungen nicht befolgt, kann es zu schweren Verletzungen oder Geräteschäden kommen!

WAARSCHUWING

Gevaar - opgeslagen energie: Het liftmechanisme in de toren staat onder spanning en kan uit zichzelf snel omhoog bewegen, zodra de bevestigde apparatuur wordt verwijderd. Daarom dient u GEEN apparatuur te verwijderen of aanpassingen te doen aan de liftspanning, tenzij u het voorgedeelte in de hoogste positie op de toren hebt geplaatst! Als u deze aanwijzingen niet opvolgt, kan dat leiden tot ernstig persoonlijk letsel en/of schade aan apparatuur!

AVVERTENZA

Rischio energia accumulata: Il meccanismo di sollevamento nella torre è sotto tensione e si muove rapidamente, automaticamente, non appena l'apparecchiatura collegata viene rimossa. Per questa ragione, NON rimuovere l'attrezzatura o apportare modifiche alla tensione del sollevamento a meno che il gruppo anteriore non sia stato spostato nel punto più alto della torre! La mancata osservanza di queste istruzioni potrebbe causare lesioni personali o danni alle apparecchiature!

Es ist von Bedeutung, dass Sie dieses Produkt entsprechend dem Gewicht des installierten Geräts wie in den folgenden Schritten beschrieben anpassen. Wenn Zubehör von diesem Produkt entfernt oder dazu hinzugefügt wird, was zu einer Änderung der Last führt, sollten Sie diese Einstellungsschritte wiederholen, um einen sicheren und optimalen Betrieb zu gewährleisten. Einstellungen sollten über den gesamten Verstellbereich gleichmäßig und leicht durchzuführen sein und an der eingestellten Position verbleiben. Lassen sich die Einstellungen nur schwer durchführen oder bleibt das Gerät nicht in der gewünschten Position, folgen Sie der Anleitung und lockern oder verstärken Sie die Spannung für eine gleichmäßige und leichte Einstellung. Je nach Produkt und Einstellung muss dies mehrmals wiederholt werden, um einen Unterschied zu merken.

Het is belangrijk dat u dit product aanpast volgens het gewicht van de gemonteerde apparatuur zoals beschreven staat in de volgende stappen. Telkens als er apparatuur toegevoegd wordt aan of verwijderd wordt van dit product, wat een verandering van het gewicht van de gemonteerde belasting tot gevolg heeft, moet u deze aanpassingsstappen herhalen om een veilige en optimale werking te garanderen.

Verplaatsingen moeten soepel en eenvoudig over het volle bewegingsbereik mogelijk zijn, en de ingestelde positie moet gehandhaafd blijven. Als aanpassingen moeilijk zijn en de gewenste positie blijft niet gehandhaafd, dan volgt u de instructies om de spanning te verminderen of vergroten om een soepele, eenvoudige aanpassing mogelijk te maken. Al naargelang uw product en de gewenste aanpassing, kunnen een paar slagen nodig zijn om verschil te merken.

È importante regolare questo prodotto in base al peso dell'attrezzatura montata, come descritto nella procedura seguente. Ogni volta che si aggiungono o si rimuovono componenti da questo prodotto, variando quindi il peso del carico fissato, ripetere questa procedura di regolazione per garantire il funzionamento ottimale e in sicurezza. I componenti a posizione regolabile devono essere spostabili in modo regolare e agevolmente per la loro intera corsa e rimanere fermi quando li si rilasciano. Se risulta difficile regolare la posizione di un componente o questo non rimane nella posizione desiderata, seguire le istruzioni per ridurre o aumentare la tensione di bloccaggio affinché il movimento risulti agevole e facilmente regolabile. A seconda del prodotto e del tipo di regolazione, possono essere necessarie più corse prima di notare una differenza.

Höhenverstellung – rauf und runter Verstel in hoogte – Omhoog en omlaag Sollevamento – Su e Giù

Befolgen Sie diese Anleitung, um die Spannung zu lockern oder zu verstärken. Volg deze instructies om de spanning te vergroten of verkleinen. Seguire queste istruzioni per aumentare o ridurre la tensione di bloccaggio.

Neigung – vor und zurück Kantel – Naar voren en naar achteren Inclinazione – Avanti ed Indietro

Befolgen Sie diese Anleitung, um die Spannung zu lockern oder zu verstärken. Volg deze instructies om de spanning te vergroten of verkleinen. Seguire queste istruzioni per aumentare o ridurre la tensione di bloccaggio.

VORSICHT! Beim Drehen der oberen Mutter dreht sich auch die untere Mutter. Fixieren Sie die untere Mutter KEINESFALLS. Bei Nichteinhaltung dieser Anweisung kann es zu erheblichen Schäden kommen.

VOORZICHTIG! Tijdens het aanpassen van de bovenste moer draait de onderste moer mee. GEBRUIK GEEN gereedschap op de onderste moer. Er kan ernstige schade ontstaan als deze instructies niet opgevolgd worden.

ATTENZIONE. Il dado inferiore gira durante la regolazione del dado superiore; NON applicare nessun attrezzo al dado inferiore. Se non si seguono queste istruzioni, si possono causare danni gravi.

400mm Extension Hardware

6 ERMITTLUNG ANGEMESSENER MONTAGETEILE FÜR IHREN BILDSCHIRM: ZORG VOOR ADEQUATE BEVESTIGINGSMATERIALEN VOOR UW DISPLAYMODEL: INDIVIDUARE LA VITERIA ADATTA PER IL DISPLAY:

Large Display Cart Hardware

Schraubendurchmesser
Schroefdiameter
Diametro della vite

Schraubenlänge
Schroeflengte
Lunghezza della vite

WICHTIG: Um sicherzustellen, dass die Schrauben über die minimale Gewindegängigkeit für den Bildschirm verfügen, ziehen Sie diese mit mindestens sechs vollen 360-Grad-Umdrehungen an.
BELANGRIJK: Om ervoor te zorgen dat de schroeven voldoende ver in de display zijn gedraaid, moet u de schroeven vastzetten met minimaal zes volledige slagen (van 360°).
NOTA BENE: per far si che viti siano inserite nel display per la lunghezza minima di filettatura, avitarle per almeno sei giri completi.

WARNUNG: Zu festes Anziehen der Schrauben kann zu Beschädigungen führen.
LET OP: draai de schroeven niet te strak aan. Te strak aandraaien kan schade veroorzaken aan uw apparatuur.
ATTENZIONE: Non stringere eccessivamente i dispositivi di fissaggio. Ciò potrebbe causare danni all'apparecchiatura.

Aussparung
Verzonken
Incassata

Verwenden Sie die in Schritt 6 gewählten Montageeile.
Gebruik het bevestigingsmateriaal van stap 6.
Usare un dispositivo di fissaggio scelto dal punto 6.

$y^1 = y^2$
 $x \leq 600\text{mm}$

**MINIMALE GEWINDETIEPE
MINIMALE SCHROEFDIEPTE
MINIMO FILETTATURA**

4mm	4	40mm	4mm	20mm	4mm
5mm	5	40mm	5mm	20mm	5mm
6mm	6	45mm	6mm	20mm	6mm
8mm	8	50mm	8mm	25mm	8mm

g Befestigen Sie die Schrauben mit mindestens sechs vollen 360° Umdrehungen. Achten Sie darauf, dass die Schrauben dabei nicht überdrehen. Überdrehen der Schrauben könnte das Display und/oder die Längsträger beschädigen.

* Sechs volle Umdrehungen stellen sicher, daß die Schraube im Verhältnis zu ihrem Durchmesser ausreichend tief versenkt wurde. Bei einem Schraubendurchmesser von 8 mm würde dies eine minimale Versenkung der Schraube von ebenfalls 8 mm im Gewindegang bedeuten.

g Draai de schroeven met tenminste zes slagen van 360° vast, maar draai ze niet te strak; het te strak aandraaien van de schroeven kan schade toebrengen aan de monitor en/of de monitorhouders.

* Zes volledige slagen zorgen voor een minimale inschroefdiepte die ongeveer gelijk is aan de diameter van de schroef. Bijvoorbeeld, als de diameter van schroef 8 mm is, dan is de minimale schroefdiepte ook 8 mm.

g Serrare le viti con almeno sei giri completi di 360°, badando a non eccedere; un sovrasserraggio può essere la causa di danni tanto al display che alle Staffe.

* Sei giri completi in genere assicurano una penetrazione minima pari ad almeno il diametro della vite. Per esempio, se la vite ha un diametro di 8 mm, anche il valore della penetrazione sarà pari a 8 mm.

⚠️ WARNING

STORED ENERGY HAZARD! DO NOT OPEN TOWER OR REMOVE SAFETY GUARD!

A primary mechanism within the tower is under tension and can be hazardous to people exposed to it under certain extreme conditions. DO NOT open the tower; DO NOT attempt to service the cart/stand. DO NOT remove safety guards or labels designed to protect or inform of possible hazards. Only Ergotron-approved installers may service or otherwise modify cart/stand. Failure to heed this Warning may result in serious Personal Injury and Damage both to the cart/stand and equipment.

⚠️ WARNING

DO NOT load the Cart/Stand past maximum weight capacity. DO NOT mount a display larger than the recommended size. Failure to comply with warning may result in Cart/Stand instability leading to equipment damage or personal injury.

⚠️ WARNING

TIPPING HAZARD!

DO NOT allow children on Cart / Stand.
DO NOT route electric cords or equipment cables within reach of children. LOCK CASTERS when Cart is stationary. Failure to comply with this warning may result in Cart / Stand instability leading to equipment damage or personal injury.

⚠️ CAUTION

TIPPING HAZARD!

DO NOT move Cart with Display in highest position. DO NOT push Cart from front or back of Tower. DO NOT move Cart over cords or uneven, dirty, soft or sloping surfaces. DO NOT move Cart by pushing on Display. Failure to comply with this caution may result in Cart instability leading to equipment damage or personal injury.

TO MOVE CART

1. Push Display down to lowest position on Cart.
2. Disconnect power cord and attach to Tower.
3. Unlock casters; point casters in direction of travel.
4. Push Cart from side with hands on Tower.

13

1x **2x** M4 x 17mm

WARNING: Stored Energy Hazard: The lift mechanism in the tower is under tension and will move up rapidly on its own, as soon as attached equipment is removed. For this reason, DO NOT remove equipment or make adjustments to lift tension unless the front assembly has been moved to the highest position on the tower! Failure to follow this instruction may result in serious personal injury and/or equipment damage!

ADVERTENCIA: Riesgo de energía almacenada: El mecanismo de elevación de la torre está bajo tensión y se moverá rápidamente hacia arriba por sí solo si se retira el equipamiento que hay conectado al mismo. Es por ello que NO deberá quitar equipamiento ni hacer ajustes en la tensión de elevación a menos que la estructura delantera se haya movido antes hacia la posición más alta de la torre. No seguir estas instrucciones podría provocar daños personales y/o materiales graves.

AVERTISSEMENT: Danger : Le mécanisme de déviation dans la tour est sous tension et se lève rapidement, tout seul, dès que le matériel est retiré. Pour cette raison, NE PAS retirer votre matériel ou faire des ajustements à la tension d'élevation à moins que la partie avant n'ait été mise à la position la plus élevée de la tour ! Risque de blessure corporelle ou d'endommagement matériel en cas de non respect de cette instruction.

WARNING: Gefährdung durch gespeicherte Energie: Der Lift-Mechanismus im Turm steht unter Spannung und bewegt sich aus eigenem Antrieb schnell nach oben, sobald das befestigte Zubehör entfernt wird. Aus diesem Grund darf das Zubehör NICHT ENTFERNT WERDEN oder die Einstellung der Spannung verändert werden, bevor der vordere Geräteteil sich auf der höchsten Position am Turm befindet! Werden diese Anweisungen nicht befolgt, kann es zu schweren Verletzungen oder Geräteschäden kommen!

WAARSCHUWING: Gevaar - opgeslagen energie: Het liftmechanisme in de toren staat onder spanning en kan zichzelf snel omhoog bewegen, zodra de bevestigde apparatuur wordt verwijderd. Daarom dient u GEEN apparatuur te verwijderen of aanpassingen te doen aan de liftspanning, tenzij u het voorgedeelte in de hoogste positie op de toren hebt geplaatst! Als u deze aanwijzingen niet opvolgt, kan dat leiden tot ernstig persoonlijk letsel en/of schade aan apparatuur!

AVVERTENZA: Rischio energia accumulata: Il meccanismo di sollevamento nella torre è sotto tensione e si muove rapidamente, automaticamente, non appena l'apparecchiatura collegata viene rimossa. Per questa ragione, NON rimuovere l'attrezzatura o apportare modifiche alla tensione del sollevamento a meno che il gruppo anteriore non sia stato spostato nel punto più alto della torre! La mancata osservanza di queste istruzioni potrebbe causare lesioni personali o danni alle apparecchiature!

警告: 蓄積エネルギーの危険性: タワーのリフト機構には張力がかかっており、付属していた器具が取り外される瞬間に高速で上に移動します。このため、前面の部品がタワーの最高位置にきていない場合は、器具を取り外したり、張力を調節して増加させないようにしてください。この指示に従わない場合、重篤な身体傷害およびまたは器具の破損の原因となります。

警告: 儲能危険: 支柱中の升降机构有张力并会在拆除所安装的设备后自行快速上升。因此,在将前部装置移到支柱最高顶部时,不要拆除设备或调节升降张力。不遵守本规定可能导致严重的人身伤害和/或设备损坏!

경고: 저장에너지 위험성: 타워의 리프트 기계장치는 장력을 받는 상태에 있으며, 장속 장비가 제거되자마자 바로 자체의 빠른 속도로 올라가게 됩니다. 이러한 이유로 장비 해체/분리가 타워의 가장 높은 지점으로 올라가거나 또는 장력이 증가하는 장비 제거나 리프트의 장력을 조정하지 마십시오! 이 안내를 따르지 않으면, 심각한 부상 및/또는 장비의 손상을 초래할 수 있습니다!

 圧力を増減するには次の手順に従います。
 遵照这些说明拧紧或放松。
 다음 지침에 따라 장력을 높이거나 풀어주세요.

-15°

+5°

90°

25 - 50 lbs (11.3 - 22.7 kg)

≤30 lbs (15 kg)

≤5 lbs (2.2 kg)

WARNING: Stored Energy Hazard: The lift mechanism in the tower is under tension and will move up rapidly on its own, as soon as attached equipment is removed. For this reason, DO NOT remove equipment or make adjustments to lift tension unless the front assembly has been moved to the highest position on the tower! Failure to follow this instruction may result in serious personal injury and/or equipment damage!

ADVERTENCIA: Riesgo de energía almacenada: El mecanismo de elevación de la torre está bajo tensión y se moverá rápidamente hacia arriba por sí solo si se retira el equipamiento que hay conectado al mismo. Es por ello que NO deberá quitar equipamiento ni hacer ajustes en la tensión de elevación a menos que la estructura delantera se haya movido antes hacia la posición más alta de la torre. No seguir estas instrucciones podría provocar daños personales y/o materiales graves.

AVERTISSEMENT: Danger : Le mécanisme de déviation dans la tour est sous tension et se lève rapidement, tout seul, dès que le matériel est retiré. Pour cette raison, NE PAS retirer votre matériel ou faire des ajustements à la tension d'élevation à moins que la partie avant n'ait été mise à la position la plus élevée de la tour ! Risque de blessure corporelle ou d'endommagement matériel en cas de non respect de cette instruction.

WARNING: Gefährdung durch gespeicherte Energie: Der Lift-Mechanismus im Turm steht unter Spannung und bewegt sich aus eigenem Antrieb schnell nach oben, sobald das befestigte Zubehör entfernt wird. Aus diesem Grund darf das Zubehör NICHT ENTFERNT WERDEN oder die Einstellung der Spannung verändert werden, bevor der vordere Geräteteil sich auf der höchsten Position am Turm befindet! Werden diese Anweisungen nicht befolgt, kann es zu schweren Verletzungen oder Geräteschäden kommen!

WAARSCHUWING: Gevaar - opgeslagen energie: Het liftmechanisme in de toren staat onder spanning en kan zichzelf snel omhoog bewegen, zodra de bevestigde apparatuur wordt verwijderd. Daarom dient u GEEN apparatuur te verwijderen of aanpassingen te doen aan de liftspanning, tenzij u het voorgedeelte in de hoogste positie op de toren hebt geplaatst! Als u deze aanwijzingen niet opvolgt, kan dat leiden tot ernstig persoonlijk letsel en/of schade aan apparatuur!

AVVERTENZA: Rischio energia accumulata: Il meccanismo di sollevamento nella torre è sotto tensione e si muove rapidamente, automaticamente, non appena l'apparecchiatura collegata viene rimossa. Per questa ragione, NON rimuovere l'attrezzatura o apportare modifiche alla tensione del sollevamento a meno che il gruppo anteriore non sia stato spostato nel punto più alto della torre! La mancata osservanza di queste istruzioni potrebbe causare lesioni personali o danni alle apparecchiature!

警告: 蓄積エネルギーの危険性: タワーのリフト機構には張力がかかっており、付属していた器具が取り外される瞬間に高速で上に移動します。このため、前面の部品がタワーの最高位置にきていない場合は、器具を取り外したり、張力を調節して増加させないようにしてください。この指示に従わない場合、重篤な身体傷害およびまたは器具の破損の原因となります。

警告: 儲能危険: 支柱中の升降机构有张力并会在拆除所安装的设备后自行快速上升。因此,在将前部装置移到支柱最高顶部时,不要拆除设备或调节升降张力。不遵守本规定可能导致严重的人身伤害和/或设备损坏!

경고: 저장에너지 위험성: 타워의 리프트 기계장치는 장력을 받는 상태에 있으며, 장속 장비가 제거되자마자 바로 자체의 빠른 속도로 올라가게 됩니다. 이러한 이유로 장비 해체/분리가 타워의 가장 높은 지점으로 올라가거나 또는 장력이 증가하는 장비 제거나 리프트의 장력을 조정하지 마십시오! 이 안내를 따르지 않으면, 심각한 부상 및/또는 장비의 손상을 초래할 수 있습니다!
