

DMPS3-4K-100-C/DMPS3-4K-50

3-Series® 4K DigitalMedia™ Presentation Systems

DO

Install the Device

The DMPS3-4K-100-C and DMPS3-4K-50 can be mounted into a rack, mounted under a table, or placed onto a flat surface.

Mounting into a Rack

The DMPS3-4K-100-C and DMPS3-4K-50 each occupy 1U of rack space. Using a #1 or #2 Phillips screwdriver, attach the two included rack ears to the device. Then, mount the device into the rack using four mounting screws (not included). Refer to illustration ❶.

❶ Mounting into a Rack

Mounting under a Table

Using a #1 or #2 Phillips screwdriver, attach the four included table mount brackets to the device. Then, attach the four table mount brackets to the underside of the table using four mounting screws (not included). Refer to illustration ❷.

❷ Mounting under a Table

Placing onto a Flat Surface

When placing the device onto a flat surface or stacking it with other equipment, attach the included feet near the corners on the underside of the device.

DO

Make Connections to the Rear Panel

Make connections to the rear panel of the device. For DMPS3-4K-100-C connections, refer to illustration ❸. For DMPS3-4K-50 connections, refer to illustration ❹.

DO

Check the Box

QUANTITY	PRODUCT	COLOR	PART NUMBER
2	Bracket, Rack Ear, 1U		2032122
4	Bracket, Under Table Mount		2041951
1	Connector, 4-Pin		2003576
2	Connector, 5-Pin		2003577
1	Emitter Probe, IR, Crestron® STIRP		2001137
4	Foot, 0.5" x 0.5" x 0.23", Adhesive	Black	2002389
1	Power Cord, 6' 7" (2 m)		2001134
DMPS3-4K-100-C Only			
1	Connector, 3-Pin		2003575
Not Included: Cables, Rack Mount Screws, and Table Mount Screws			

❸ DMPS3-4K-100-C Rear Panel Connections

For VGA pin assignment information, refer to illustration ❶.
For DM OUT wiring information, refer to illustration ❷.
For AUDIO OUT pin assignment information, refer to illustration ❸.
For LAN pin assignment information, refer to illustration ❹.
For NET pin assignment information, refer to illustration ❺.

❹ DMPS3-4K-50 Rear Panel Connections

For VGA pin assignment information, refer to illustration ❶.
For AUDIO OUT pin assignment information, refer to illustration ❷.
For LAN pin assignment information, refer to illustration ❸.
For NET pin assignment information, refer to illustration ❹.

5 VGA Connector Pin Assignments

PIN NUM.	RGB	YPbPr	S-VIDEO	COMPOSITE
1	R	Pr	C	
2	G	Y	Y	
3	B	Pb		COMP
5	GND	GND	GND	GND
6	RED_GND	Pr_GND	C_GND	
7	GRN_GND	Y_GND	Y_GND	
8	BLU_GND	Pb_GND		
13	H			
14	V			

NOTE: For best video performance, ground connections should be kept separate. Do not connect ground wires to the connector shell. The connector shell is reserved for the cable shield.

6 DM OUT Connector Wiring (DMPS3-4K-100-C Only)

PIN NUM.	WIRE COLOR	PIN NUM.	WIRE COLOR
1	Orange/White	5	Blue/White
2	Orange	6	Green
3	Green/White	7	Brown/White
4	Blue	8	Brown

7 AUDIO OUT Pin Assignments

SIGNAL NAME	BALANCED AUDIO OUTPUT	UNBALANCED AUDIO OUTPUT
+	L+	L+ Out
-	L-	Open
G	Shield/Ground	Common Ground
+	R+	R+ Out
-	R-	Open

Balanced Output

Unbalanced Output

8 LAN Pin Assignments

PIN NUM.	SIGNAL	PIN NUM.	SIGNAL
1	TX+	5	N/C
2	TX-	6	RX-
3	RX+	7	N/C
4	N/C	8	N/C

9 NET Pin Assignments

24 Y Z G	24: Power, 24 Vdc (Red Wire) Y: Data (White Wire) Z: Data (Blue Wire) G: Ground (Black Wire)
-----------------	---

DO Determine the Address of the Device

The DMPS3-4K-100-C and DMPS3-4K-50 can be addressed using the hostname. The default hostname is DMPS3-xxxxxxx, where xxxxxx consists of the last eight characters (excluding punctuation) of the MAC address. For example, if the MAC address is 00:10:7F:08:09:AA:05, the default host name is DMPS3-0809AA05. The MAC address is labeled on the rear panel of the DMPS3-4K-100-C and DMPS3-4K-50.

Alternatively, the DMPS3-4K-100-C and DMPS3-4K-50 can be addressed using the IP address of the device. By default, DHCP is enabled. To set a static IP address, use the Crestron Toolbox™ application on a PC that connects to the device via the Ethernet network or a USB connection to the COMPUTER port on the front panel of the device. If the PC connects to the Ethernet network, the Device Discovery Tool in the Crestron Toolbox application can be used to find the current IP address.

DO Commission the System

Using the web interface, configure the DMPS3-4K-100-C or DMPS3-4K-50. To access the web interface, open a web browser and go to the setup directory of the device by entering either of the following:

`hostname/setup` (*hostname* is the hostname of the device)

or

`xxx.xxx.xxx.xxx/setup` (*xxx.xxx.xxx.xxx* is the IP address of the device)

The DMPS3-4K-100-C and DMPS3-4K-50 also provide the built-in DMPS .AV Framework™ Base Program, which enables complete system control without requiring additional programming. Control is accomplished using the Crestron TSW-752 Touch Screen (TSW-752-B-T DMPS3 PAK KIT), the Crestron XPanel interface, or the Crestron Control App for Apple® iPad® tablet. All VT Pro-e® projects as well as the latest version of the DMPS .AV Framework Base Program are available on the DMPS3-4K-100-C and DMPS3-4K-50 product web pages. For more information, refer to Answer ID 5636 in the Online Help on the Crestron website (www.crestron.com/onlinehelp).

DO Allow Automatic Switching or Manually Select an Input

By default, automatic switching of inputs is enabled. Automatic switching causes the last connected input to be routed to the output. The AUTO LED lights to indicate that automatic switching is enabled.

To manually select and activate the desired input, press one of the **VGA** (1–4) or **HDMI** (1–4) **INPUT SELECT** buttons. Refer to the following table for a summary of the LED behavior of selected and nonselected inputs.

LED COLOR	DESCRIPTION
Solid green	The input is the active selection, and an incoming signal is detected.
Flashing green	The input is the active selection, and an incoming signal is not detected.
Solid amber	The input is not the active selection, and an incoming signal is detected.
Off	The input is not the active selection, and an incoming signal is not detected.

NOTE: Manual selection of an input disables automatic switching. When automatic switching is disabled, the AUTO LED turns off.

1. The DM OUT port of the DMPS3-4K-100-C is a PoDM (Power over DM) and PoH (Power over HDBaseT) PSE (Power Sourcing Equipment) port. Any wiring that is connected to a PoDM or PoH PSE port is for intra-building use only and should not be connected to a line that runs outside of the building in which the PSE is located.

DO Learn More

Visit the website for additional information and the latest firmware updates. To learn more about this product, use a QR reader application on your mobile device to scan the QR images.

DMPS3-4K-100-C

DMPS3-4K-50

CE As of the date of manufacture, the product has been tested and found to comply with specifications for CE marking.

Federal Communications Commission (FCC) Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Industry Canada (IC) Compliance Statement

CAN ICES-3(B)/NMB-3(B)

Rack Mounting Safety Precautions

- Elevated Operating Ambient Temperature: If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient temperature. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximum ambient temperature (T_{ma}) specified by the manufacturer.
- Reduced Airflow: Installation of the equipment in a rack should be such that the amount of airflow required for safe operation of the equipment is not compromised.
- Mechanical Loading: Mounting of the equipment in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading.
- Circuit Overloading: Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of the circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.
- Reliable Earthing: Reliable earthing of rack-mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g., use of power strips).

Electrical Connection

- "This product must be connected to an earthed mains socket-outlet."
- Finland: "Laitte on liitettävä suojamaadoituskoskettimilla varustettuun pistorasiaan."
- Norway: "Apparatet må tilkoples jordat stikkontakt."
- Sweden: "Apparaten skall anslutas till jordat uttag."
